

SERVO MOTOR TYPE  
STABILIZER

**Humer**  
Wall Mount  
**3-10KVA**

**Characteristics**

- » International Standards
- » Multi design
- » Full Warranty
- » LCD display and Central processing CPU Unit
- » Smooth Regulating Process
- » Over Voltage Protection
- » Low Voltage Protection
- » Electrical Overload Protection
- » Over Temp Protection

**Technical Specification**

**TECHNICAL DATA**

|                                  |   |
|----------------------------------|---|
| Product Model                    | Humer Wallmount Full Automatic Voltage Stabilizer |
| The Input Voltage                | 110 - 250   |
| Output Over Voltage V            | 220x (1 ± 4 %)                                    |
| Output Over Voltage Protection V | 246 ±4  |
| Frequency Hz                     | 50 or 60  |
| Temperature Rise K               | <90   |
| Efficiency %                     | >92   |
| Response time S                  | <1  |
| Delay time                       | Short: 5s Long; 5min or 10min                     |
| Withstanding Voltage             | 1500v/ 1min                                       |

**PROs**

- ▶ Smooth stabilization
- ▶ Stable and continuous voltage
- ▶ High accuracy

**CONS**

- ▶ Lower speed of voltage regulation
- ▶ Easy to induce contact spark
- ▶ Easy to wear out the carbon brush
